Exp3: Create a dynamic To-Do List where users can add, mark as complete, and remove tasks using JavaScript and DOM

Index.html:

```
<!DOCTYPE html>
<html>

<head>
   <title>To-Do List</title>
   <link rel="stylesheet" href="style.css">
</head>

<body>
   <script>
      function addTask() {
         const input = document.getElementById('task-input');
         const taskText = input.value;

         if (taskText.trim() === "") {
            alert("Please enter a task!");
            return;
         }

         const list = document.getElementById('task-list');

         const taskRow = document.createElement('div');
         taskRow.className = 'task-list-row';

         taskRow.innerHTML = `
               <div class="task-element">
                  <p>${taskText}</p>
```

```
                </div>
                <div class="task-buttons">
                    <button class="remove-task-button"
onclick="this.parentElement.parentElement.remove()">Remove</button>
                    <button class="mark-as-completed-button" onclick="this.innerHTML = 'Task
completed'">
                    Mark as completed
                    </button>
                </div>
                `;

            list.appendChild(taskRow);
            input.value = "";
        }
    </script>

    <h1>To-Do List</h1>
    <div class="list-input-section">
        <div class="input-text">
            <input type="text" id="task-input">
        </div>
